PROFESSIONAL SUMMARY

Security-focused Endpoint and Systems Administrator with hands-on experience managing Windows endpoints through Microsoft Intune, Autopilot, Entra ID, Microsoft Defender, Conditional Access, RBAC, and PowerShell automation. Proven track record eliminating standing local administrator access across 300+ devices, strengthening endpoint security, and standardizing identity, access, provisioning, and deprovisioning processes. Experienced in device compliance, endpoint hardening, vulnerability remediation, SSO/MFA, and SOC 2-aligned controls. Currently pursuing the Microsoft SC-300: Identity and Access Administrator certification.

TECHNICAL SKILLS

Identity & Access: Entra ID, Okta, SAML/SSO, MFA, RBAC, Conditional Access, identity lifecycle, joiner/mover/leaver workflows, group-based access control, least privilege, Zero Trust

Security & Compliance: Microsoft Defender, Nessus, vulnerability remediation, endpoint hardening, SOC 2-aligned controls, security baselines, local admin restriction, access control enforcement

Cloud & Microsoft: Azure IAM, Azure Monitor, Log Analytics, Azure VMs, Microsoft 365 Admin, Exchange Online, SharePoint, OneDrive, Teams, Google Workspace Admin

Endpoint Security: Microsoft Intune, Windows Autopilot, compliance policies, configuration profiles, endpoint security baselines, Windows Update rings, app deployment, device lifecycle

Infrastructure: Windows Server, Active Directory, Group Policy, WSUS, VMware vSphere/ESXi, DNS, DHCP, VPN, hybrid on-premises/cloud environments

Automation & Monitoring: PowerShell (access provisioning, policy automation, mailbox management), Azure Monitor, OPMAN, Datadog, Log Analytics, alerting dashboards

PROFESSIONAL EXPERIENCE

IT Support Engineer II — Endpoint & IAM Engineering | [The Zebra](#) *Sept 2025 – Apr 2026*

- Eliminated standing local administrator access across 300+ endpoints by implementing RBAC and privileged access workflows, reducing attack surface and aligning with least-privilege security practices.
- Administered Okta, Entra ID, and Google Workspace identity lifecycle processes — user provisioning/deprovisioning, SSO, MFA enforcement, group-based access control, and account maintenance across joiner/mover/leaver workflows.
- Configured and maintained SAML/SSO, MFA policies, RBAC, Conditional Access, group membership, and access policy enforcement.
- Built Microsoft Intune endpoint management from the ground up, standardizing compliance baselines, security policies, and device management across 300+ endpoints.
- Enforced SOC 2-aligned user and device security controls through identity hygiene, endpoint compliance requirements, and least-privilege access workflows.
- Automated identity, access, and M365 administration tasks with PowerShell for group provisioning, mailbox modifications, printer SMTP deployment, and policy configuration.

System Administrator | [FirstDay Foundation](#) *Mar 2024 – Aug 2025*

- Managed Entra ID as the core cloud identity platform across hybrid environments with Conditional Access, RBAC, access policy enforcement, and hybrid identity administration.
- Performed routine server and endpoint hardening, vulnerability remediation, and patch validation using Microsoft Defender, Nessus, and WSUS.
- Administered Active Directory, Group Policy, WSUS, DNS, DHCP, VPN, and Windows Server infrastructure supporting ~2,000 users across 180+ VMware virtual machines.
- Built infrastructure monitoring and alerting dashboards in Azure Monitor and OPMAN; reviewed system alerts and logs to identify security concerns and remediation needs.
- Maintained documentation for system configurations, infrastructure topology, access controls, and security-relevant operational procedures.

IT Helpdesk Technician | **MVM Inc** *Nov 2022 – Mar 2024*

- Supported launch of 4 remote sites; deployed and tracked 100+ endpoints including laptops, mobile devices, and printers.
- Provided rotating 24x7 on-call support, resolving account access, endpoint, VPN, and network issues for remote and on-site users.

IT Help Desk Technician | **QA Systems Inc** *Aug 2022 – Oct 2022*

- Delivered Tier 1–2 remote support across 126 Austin ISD schools, troubleshooting user accounts, endpoints, applications, and connectivity.

EDUCATION & CERTIFICATIONS

Certifications: CompTIA Security+ | AZ-900 Azure Fundamentals | AZ-104 Azure Administrator | SC-300 (In Progress)
